HEALTH & BEAUTY

PEPTIDES®: UNITY OF HEALTH, YOUTH, AND BEAUTY

Peptides® offers a wide range of unique products designed to promote health, youthfulness, and beauty.

The brand's portfolio includes cutting-edge developments in peptide and non-peptide bioregulation, supplements for preventive care and health support, as well as effective cosmetics for comprehensive care of the face, body, and hair.

Since its founding in 2010, Peptides® has confidently maintained a leading position in the field of anti-aging medicine. The company is built on a solid scientific foundation and a strategic partnership with the St. Petersburg Institute of Bioregulation and Gerontology – a world-class research center established by the prominent scientist, academician Vladimir Khavinson.

Under his leadership, the concept of peptide regulation of bodily functions was formulated – a foundation for an entire branch of modern gerontology.

Every Peptides® product undergoes rigorous scientific and clinical evaluation, supported by deep expertise and in full compliance with international quality standards. This is confirmed by GMP and ISO certifications, as well as the designation of "Trusted Supplier of Goods and Services" – an official mark of confidence from both the professional community and consumers.

The company also offers a convenient and functional B2B platform with all the tools necessary for effective business operations.

Peptides® is more than just a brand. It is a realm of high technology, advanced science, and genuine care for people. It is the choice of those who strive for active longevity, vitality, and natural harmony.

INTERNATIONAL DEVELOPMENT

Peptides® is actively expanding its global presence, with a particular focus on the European market. Today, the company's products are successfully sold in over 200 dealerships worldwide, including key countries in the European Union and the United States. Thanks to an efficient delivery system, innovative solutions for health, beauty, and longevity are now accessible to clients even in the most remote regions of the globe.

In line with its global development strategy, Peptides® is steadily increasing its production capacity in Europe. This expansion allows for optimized logistics, reduced delivery times, and consistently high product quality for European partners and customers – all in accordance with stringent international standards.

peptideproduct.com

The company regularly participates in international congresses and conferences of the International Association of Gerontology and Geriatrics (IAGG), reinforcing its scientific credibility and the recognition of its innovations by the global scientific community. These events enable the exchange of valuable experience with leading global experts, staying abreast of the latest trends in anti-aging medicine and bioregulation.

This strengthens Peptides® scientific potential, broadens its professional network, and facilitates the implementation of cutting-edge approaches and technologies in the development and production of world-class products.

PEPTIDE REGULATORS – AN INNOVATIVE APPROACH TO HEALTH

Peptide bioregulators are unique compounds that act at the cellular level to regulate the body's vital processes. Based on breakthroughs in molecular biology, these short chains of amino acids can precisely target specific organs and systems.

Their mechanism of action lies in their ability to “recognize” specific DNA sequences and trigger the synthesis of proteins essential for the normal function of cells. This promotes the natural restoration of tissues, supports optimal metabolic processes, and slows down age-related changes at the cellular level.

Benefits of Peptide regulators:

- High bioavailability and effectiveness even in small doses
- Targeted action on specific organs and tissues
- Natural origin and physiological effect
- No side effects or toxicity
- Compatibility with other therapeutic agents

PEPTIDES® PRODUCT RANGE

Prime Peptide® – A New Line of Premium Nutraceuticals

Introducing the PRIME PEPTIDE® line – innovative bioregulators based on specialized peptide complexes designed for holistic health support and slowing down aging processes.

Benefits:

- Targeted action on specific body systems
- Scientifically proven effectiveness
- Synergy of peptides with bioactive ingredients
- Advanced delivery technologies for active compounds

5 Products:

Prime Peptide® Protect

- Cell protective peptides with bioactive mushroom peptides
- Peptides IPH REG and IPH EP for cancer protection and tissue regeneration.

Prime Peptide® Brain

- Cognitive system peptide with magnesium, choline, and nervonic acid
- Peptide complex IPH AGAP for memory, focus, and brain cell protection.

Prime Peptide® Collagen

- Integumentary system peptide with marine collagen and mineral chelates
- Peptide IPH AEN to support youthful skin, healthy hair, and nails.

Prime Peptide® Joint

- Musculoskeletal system peptide with liposomal glucosamine
- Peptides IPH AEN and IPH ESM for joint protection and mobility support.

Prime Peptide® Omega

- Immune system peptide with Omega 3-6-9
- Peptide IPH T with Omega-3, 6, and 9 to boost immunity and protect cells.

PRIME PEPTIDE® – a fusion of fundamental science and advanced technology for active longevity and enhanced quality of life.

Cytomaxes and Cytogens

Cytomaxes are based on natural peptides derived, aimed at restoring the body's functions and slowing aging.

Cytogens are synthesized from amino acids, characterized by short molecules and fast action.

The products are available in capsules and sublingual forms.

Comprehensive and Anti-Age Products

GPL® Man and **GPL® Femme** complexes help restore the vascular, nervous, endocrine, and reproductive systems, as well as support the body after post-COVID changes. By balancing the body's systems, these products help prolong youth and maintain health.

Products in the Revilab Pro and Revilab Peptide series slow down aging, normalize metabolism, and activate the body's internal resources.

PRO Peptide Complexes

A new generation of topical bioregulators based on natural peptides. The new formula enables direct and targeted action on organs and systems, with a higher concentration of active ingredients in each complex.

Hair Line – A New Hair Care Series

A comprehensive hair care system including:

- SHAMPOO PEPTIDES – Delicately cleanses scalp and hair
- CONDITIONER PEPTIDES – Restores moisture and strengthens hair structure
- HAIRMASK PEPTIDES – Deep nourishment and repair
- MESOTONIC PEPTIDES – Stimulating hair growth and revitalizing hair follicles
