Introduction

Thank you taking the time to read this brief presentation on the Biorez Meta! We are a research and applied solutions directive inspired to improve health through the application and innovation of bioresonance technologies.

Background

Numerous studies in the field of Energy Informatics led to the creation of fundamentally new equipment capable of accessing the subconscious. This process of controlled research is able to give an enormous amount of new information about the surrounding world especially as it relates to human health. These are new opportunities for diagnosis - different from conventional ultrasound and computer tomography.

Theoretical and experimental work, foundational to the development of bioresonance devices, was initiated in the late eighteenth century by electronics genius Nikola Tesla. This was then continued by George Lakhovsky, a scientist who studied the effects of radio waves on animal health and health conditions of plants. In the 1930s, an American researcher and inventor named Royal Rife, investigated the effects of radio and other electro-magnetic frequencies on the human body. He was able to successfully remedy imbalances and treat major diseases and illness using frequency based technologies.

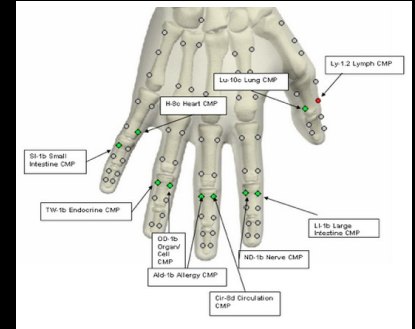

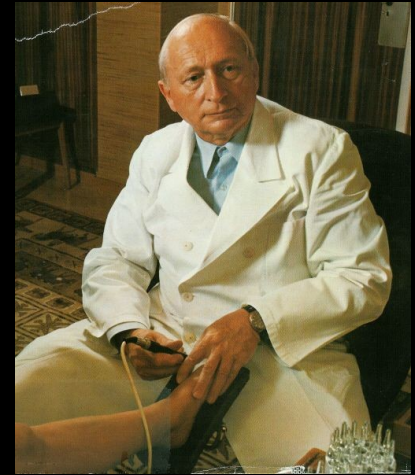

Background continued...

In 1950, R. Voll in Russia discovered and developed a system of electrical testing of the acupuncture points on the human body. Voll's method was the first hardware method to research the energetic state of an organism. With the use of a special probe, the rate of electromagnetic conductivity at the end points of acupuncture meridians is measured. The results of the study (in the form of digital or graphic indicators) may give an idea of the presence of inflammatory, dystrophic or atrophic pathology in the studied meridian and the corresponding organs.

Another well-known method for diagnosing the human energy field or aura is called **Kirlian Aura Diagnostics**. Using a special camera that measures gas discharge, the status of individual organs are determined by qualitative analysis.

This non-linear diagnostic method (NLS) evaluates the energy state of each organ individually. The results are expressed as visual images with the topography of the affected area as well as graphical features to analyze the data. This can lead to a more accurate determination of the type of injury (inflammation or destruction) and to clarify the diagnosis.

Background continued

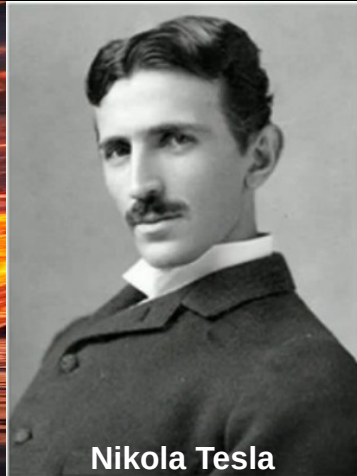

With NLS technology, research is conducted by resonance amplification of radiation. This information is collected with a non-contact method using trigger sensors such as headphones and resonant chambers.

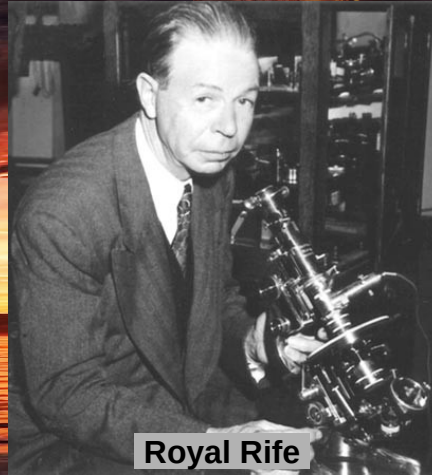

The first version of a non-linear analysis device had only a manual input to collect information. The operator was actively involved in the diagnosis of the subject. Low frequency vibrations that are close to the theta rhythm of the brain were used to initiate a more sensitive state to radiation. The results were recorded using the deviation of an L-shaped frame held by the operator on Fleindler's special scale (this scale is presented in the software). However, this method of research is too subjective and not safe for the health of the operator. This led to the development and creation of trigger sensors that collect the data automatically using the software.

Background continued

For the first time in the 1920s, V.N. Kravkov experiments measured a distant effect from the interaction between animate and inanimate objects. This involved the transfer of data pulses from man to machine. Under the guidance of Prof. V. Togatova, reactions of various semiconductor structures on the impact of bio-operators (psychic) were studied. It has been experimentally proven that the human brain, without the aid of wires, can affect sensitive sensor devices.

Nikola Tesla

Royal Rife

Svyatoslav P Nesterov

The BioRez Meta possesses a digital trigger sensor, simulated directly in the microprocessor of the main unit through the computer software and an analog trigger sensor connected to the host unit (a pn-junction transistor which increases the reliability of research).

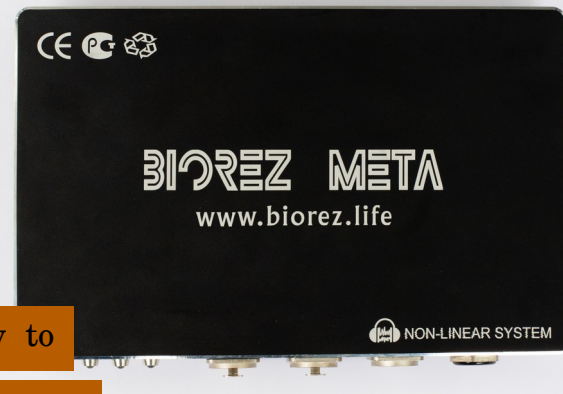

The purpose of this background is not a detailed physical justification of the principles of the BioRez Meta since different devices are designed differently. Currently, there are several manufacturers of this equipment; 'spinoffs' from the original research group. In particular, the Russian original version used the headphones as magneto-inductors with an oscillation frequency close to the theta rhythm of the brain. While in later versions, the headphones were also used as a conductor of electromagnetic waves that are close to the alpha rhythm of the brain. A good effect is obtained from the use of electromagnetic waves as a trigger mechanism for the study of a healthy body.

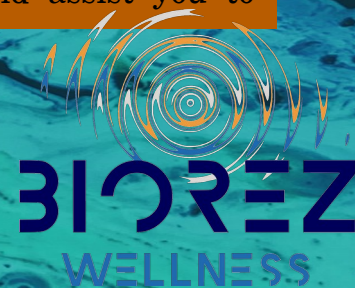

Accurate and convenient diagnosis is a cornerstone of vibrant health in this modern age

- huf sirius, co-founder Biorez Wellness Technologies

NON-LINEAR SYSTEM (NLS) technologies have proven their worth to us as a modern day essential tool for maintaining one's WELLNESS.

The BIOREZ META HEALTH ANALYZER possesses a profound ability to accurately measure and forecast disease and illness. Essentially a frequency generator and analyzer, it is able to inspect and diagnose the health of an individual by generating electromagnetic pulses of known frequencies. These oscillations are broadcast into your field using bio-inductive headphones or the REMOTE QUANTUM BLACK BOX. The resultant resonance sets are measured, resolved, and organized for practical use. The scope of research is determined by the topics and inspections you choose from the extensive database included in the software. The system can determine detailed information about your health and assist you to re-calibrate to healthy frequencies which can initiate self healing of overlooked or disconnected parts of your body and mind.

The Setup

A host unit contains the electronics that are driven and controlled by a software with a vast database of information necessary to conduct scans and perform treatments. The user friendly software interface effectively organizes and manages the data that it generates for interpretation, analysis and treatment. It is available in many languages and software updates are included during the warranty period.

HOMEOPATHICS

The advertisement features a central image of a human silhouette with glowing molecular structures. The background is a dark blue space with white stars. The text is arranged around the silhouette, with the product name and benefits at the top and the specific applications at the bottom right.

Test Topics and Spectral Etalons

The software contains a database with over 5000 spectral etalons. Etalons are test items (i.e. frequency sets) that can be resonantly measured. They are organized into specific topics as below.

VIEW REPORT

There is a Core Set of Topics that the Software is Capable of Detecting and Measuring

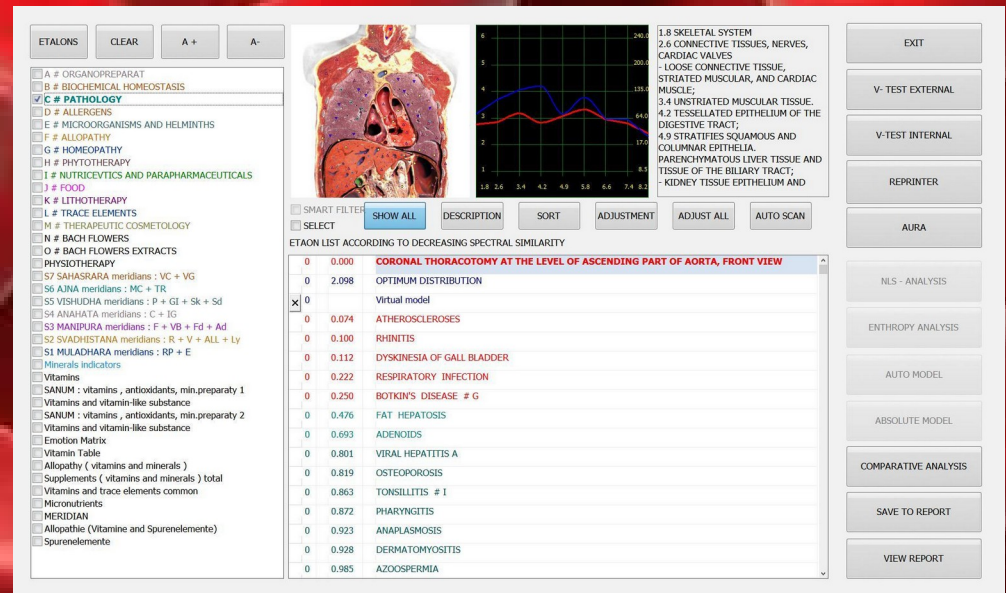

Microorganisms: check for the presence of pathogenic microorganisms aka parasites.

This is the white elephant in the room for most people. There are 179 types of microorganisms. Some of the main etalons include:

- **Bacterias** – *borrelia* (Lyme disease), *e. coli*, *h. pylori*, *kingella*, *salmonella*, *staph.*, *strept.*, *toxoplasma*, *mycoplasma*, *ureaplasma*
- **Fungus** – *aspergillus*, *candida*, *mucor*
- **Protozoa** – *giardia*, *histolytica*, *leishmania*, *entamoeba*
- **Viruses** – *coronavirus*, *adenovirus*, *cytomegalovirus*, *Epstein Barr*, *hepatitis*, *herpes*, *influenza*, *rhinovirus*, *rotavirus*
- **Worms** – *ascaris*, *roundworm*, *flake*, *hookworm*, *pinworm*, *threadworm*, *trichinella*, *tapeworm*

Pathology: check for the presence of disease and injury conditions currently taking place.

There are 688 types of pathologies to test from.

Choose Additional Topics from the Expansive Database of Frequencies

Emotion Matrix – yes even emotions have a frequency and are very important in determining root causes of illness.

Allergens – check for the presence of allergic elements including *chemicals, drugs, foods, heavy metals and common items*.

There are 181 types of allergens in the database.

Toxins – check for the presence of toxins including *alcohol, caffeine, carbon monoxide, chemicals, dairy, drugs, food, gluten, injury, other metals, radiation, sugar, tobacco and more*. There are 30 types of toxins in the database.

EMFs and Radiation – check for high resonance of harmful electromagnetic fields and identifies them by frequency range such as *mobile phone, low frequency radar, smart meters, electrical installations and so on*.

Food - this topic can identify beneficial and harmful foods specific to your field, organs, and present conditions. if there is a strong resonance to certain foods then this can signify deficiencies and **foods that your body can benefit from**. There are 240 types of food (etalons) in the database.

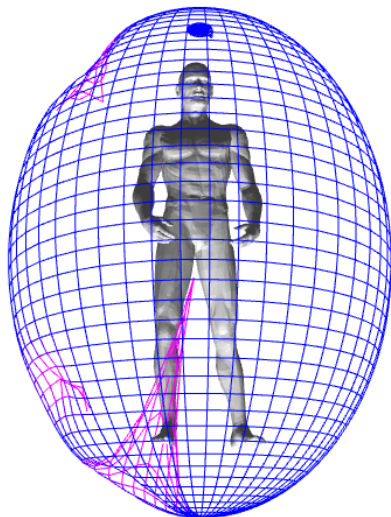

Nutrition – identify beneficial nutrients and locate nutritional deficiencies for any organ, tissue or site. Choose from multiple topics of *vitamins, minerals, co-factors, fatty acids, amino acids, and more*.

Organopreparat – Resolves **beneficial frequencies** that can be used for remedy preparation with the Vegetotest re-printer function. The re-printer function is a form of **homeopathic preparation** where a medium such as water is used to encode and store specific frequencies for intonation. It is a functional alternative to live and remote **META-THERAPY**.

Biochemical Homeostasis – Detects *hormones, vitamins, and chemicals* that are Out-of-Balance (OOB) Indicators. Key etalons organized as indicators and detectors of health include: *metabolic, key optimization, vitamins, minerals, essential fatty acids, amino acids, toxins, microbiology, EMFs/ELFs, food avoidance, food additives*.

AURA & CHAKRA ANALYSIS

The software visualizes the shape and integrity of the aura. The energetic state of each chakra, energy patterns and origins of high entropy can be investigated. View frequencies detected for each of the seven chakras. The energetic body can be analyzed and supported directly.

Energy levels 1-3 are NORMAL HEALTH/ENERGY indicators

Energy level 4 indicates BEGINNING STAGE of potential illness/imbalance

Energy level 5 indicates a possible ACUTE problem/low energy

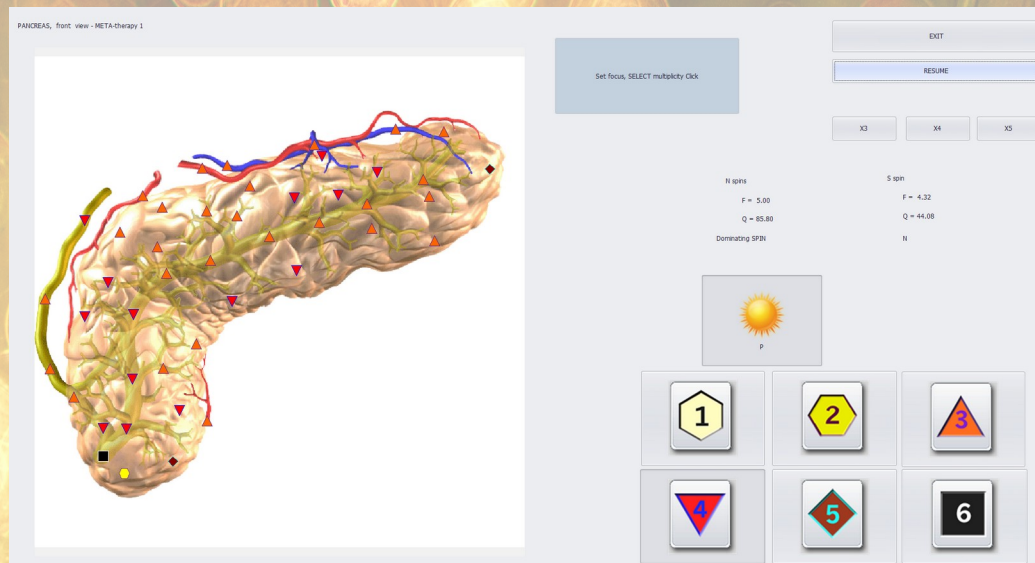

Energy level 6 indicates a CHRONIC imbalance/low energy

Non-Invasive Treatment with Bio-resonance Meta-Therapy

The software features a bio-resonance therapy called **Meta-therapy**. This frequency based treatment can be applied to the **chakras, organs and sites** with the headphones and remotely with the **Remote Quantum Black Box**. The basic principal of action is as follows: the brain will receive a signal regarding the need to test one or more organs, tissues or sites of the body.

This signal is displayed on the software interface while it is being sent into the headphones or Black Box. The signal represents a series of electromagnetic oscillations characteristic of healthy organs. Every human body possesses its own particular spectrum of electromagnetic oscillations. As the signal is broadcast, the system is constantly communicating with the

brain to inquire about the changing energetic state to that organ, tissue or site as a result of the META-THERAPY. The resultant energetic changes of this bio-feedback are displayed on screen in real time.

Conditions Treated With Bio-resonance Therapy: *Allergies, ADHD, Acute Infectious Diseases, Bronchial Asthma, Autoimmune Diseases, Degenerative Organic Diseases, Rheumatic Diseases, Arthropathy, Gynecological Disorders, Post-Vaccine Complications, Intoxication & Toxic Stress, Headaches & Migraines, Mycotic & Parasitic Disorders, All types of Pain, Neurodermatitis & Eczema, Sports Injuries, Metabolic Diseases, Pre & Postoperative Treatment(s), Secondary Viral Disorders, Urological Disorders and much more...*

There are Additional Secondary Frequency Based Therapies to ENHANCE Function

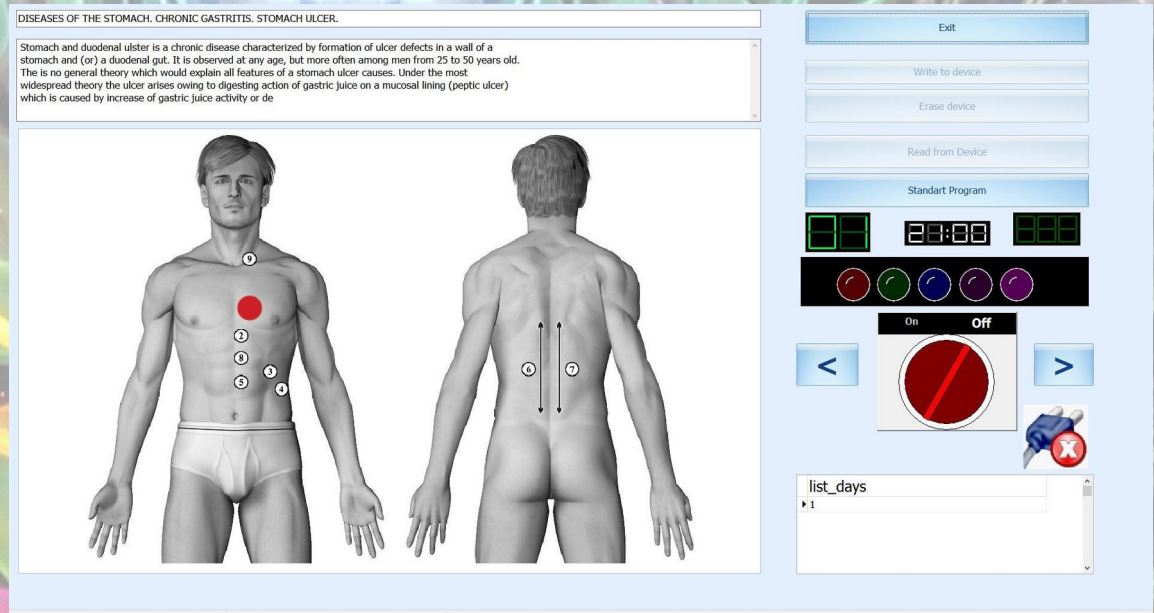

Physiotherapy – simulates this type of therapy for applicable conditions for profound effects.

Lithotherapy – virtual therapy with stones. Stone is a mineral being with a physical and energetic constitution. Both man and stone are carriers

of energy. Therefore, all beings interact with each other. The principle of lithotherapy is the manifestation of how the stone will resonate with us. How it will penetrate us. It will absorb energies that are transmitted to it, which are specific to its constitution and which do us good. The stone will give us confidence, love and vitality. At the same time, it will absorb what it does not need and that is important to know when using this therapy.

Phytotherapy – simulates herbal preparation therapies.

Homeopathic Remedy Preparations – encode typical homeopathic mediums with the RE-PRINTER function and save those remedies in the database.

Comparative Analysis:

The software visualizes a comparison pane to view and compare two scans simultaneously. Calculations of the changes in energetic state are reported.

02 DIGESTIVE SYSTEM

C # PATHOLOGY

Description	Location	Dispersion/Resonance
Notes		
Detailed Description		
GASTRITIS # G	STOMACH BACK	0.071
Chronic gastritis causes inflammation of the stomach mucosa (in some cases it affects deeper layers too). It is a widespread disease accounting for about 35 percent of all digestive system disorders and 80-85 percent of all stomach abnormalities. Chronic gastritis is sometimes a further development of acute gastritis. However, it usually develops under the influence of various exogenous factors (long-lasting or repeated periods of improper nutrition, spicy and rough food, extremely hot food insufficient medication, junk food, immoderate drinking, especially strong drinks, - alcoholic gastritis). Chronic gastritis may be caused by low-quality food (protein iron and vitamin deficiency), continuous and uncontrolled treatment by stomach-irritating medicines (Salicylas, Butadionum, Prednisolonum, some antibiotics Sulfanilamidum), industrial hazardous substances (plumbous compounds, powdered coal, metal dust, etc.), diseases causing tissue hypoxia (chronic circulation insufficiency, pneumosclerosis, anaemia), endogenic intoxications in case of gout or kidney disorder (during which the stomach mucosa discharges urae, uric acid indole, skatole, etc.), toxins during infectious diseases or when having a local chronic ridus (the so-called eliminative chronic gastritis), hereditary predisposition, etc percent of all chronic gastritis cases are accompanied by chronic cholecystitis, appendicitis, colitis and other digestive system disorders 75		
CATARRHAL GASTRITIS	WALL OF STOMACH	0.075
.Gastritis with excessive secretion of mucus		
COLITIS	TRANSVERSAL SECTION OF APPENDIX	0.148
Colitis is one of the most widespread digestion diseases. It is often combined with inflammatory affection of the thin gut (colocolenteritis) and stomach. Infectious colitis may be caused by intestinal contagions, first of all shigellosis and salmonellos, other infectious disease originators (tuberculosis microbacteria) and the .conditional-pathogenic and saprophytic intestinal flora (owing to dysbacteriosis). Protozoan colitis is caused by amebiasis, balantidiasis and lambliasis originators		
DUODENITIS	WALL OF DOUDENUM	0.164
OSTEOPOROSIS	TOOTH (MOLAR)	0.172
Osteoporosis is a progressive bone disease that is characterized by a decrease in bone mass and density which can lead to an increased risk of fracture.[1] In osteoporosis, the bone mineral density (BMD) is reduced, bone microarchitecture deteriorates, and the amount and variety of proteins in bone are altered Osteoporosis is defined by the World Health Organization (WHO) as a bone mineral density of 2.5 standard deviations or more below the mean peak bone mass (average of young, healthy adults) as measured by dual-energy X-ray absorptiometry; the term "established osteoporosis" includes the presence of a fragility fracture The disease may be classified as primary type 1, primary type 2, or secondary. The form of osteoporosis most common in women after menopause is referred to as primary type 1 or postmenopausal osteoporosis, which is attributable to the decrease in estrogen production after menopause. Primary type 2 osteoporosis or senile osteoporosis occurs after age 75 and is seen in both females and males at a ratio of 2:1. Secondary osteoporosis may arise at any age and affect men and women equally; this form results from chronic predisposing medical problems or disease, or prolonged use of medications such as glucocorticoids, when the disease is called .steroid- or glucocorticoid-induced osteoporosis		
The risk of osteoporosis fractures can be reduced with lifestyle changes and in those with previous osteoporosis related fractures, medications. Lifestyle change includes diet, exercise, and preventing falls. A review by the U.S. Preventive Services Task Force (USPSTF) found insufficient evidence to recommend calcium and vitamin D supplements to prevent fractures. Bisphosphonates are useful in those with previous fractures from osteoporosis but are of minimal benefit in those who .have osteoporosis but no previous fractures. Osteoporosis is a component of the frailty syndrome		
ENTERITIS	WALL OF SMALL INTESTINE	0.220
DYSKINESIA OF GALL BLADDER	WALL OF GALL BLADDER	0.262
Gallbladder dyskinesia, or biliary dyskinesia, is a disease where there is incomplete emptying of the gallbladder. Normally a substance called bile leaves the gallbladder through a tube known as the bile duct but, with gallbladder dyskinesia, the gallbladder is not able to contract normally in order to pump bile out. The person experiences similar symptoms to someone with gallstones, where the bile duct is blocked by stones. Symptoms of gallbladder dyskinesia typically include .nausea and pain in the upper right side of the abdomen, often experienced after eating fatty foods		
HAEMORRHOIDS	WALL OF RECTUM	0.279
The disease causes an increase in the volume of cavernous bodies the rectum and is attended with haemorrhages, thrombosis, inflammation, itch and other symptoms. The disease is prompted by impaired blood inflow and outflow regulation in the rectum cavernous veins resulting in blood stagnation. This is promoted t a sedentary way of life, constipation, inflammatory or tumorous processes in the rectum or other small pelvis organs. Excessive volume of cavernous bodies cause

This report contains SUMMARY and DETAILED RESULTS of your recent Biorez Diagnostics Test. The operator has selected the most relevant items detected in your biofield (body).

The intent of this report is to address health concerns and prevent disease. Some results represent energetic tendencies, early stage or pre-clinical changes thus we ask that you remain calm and view the results as a tool to use to improve health and not as a final confirmation of an illness or negative condition with no solutions. This is not a medical diagnosis, we advise that you verify any findings where applicable and possible.

If you would like help to interpret the report, answer questions and/or receive solutions please click on the following link to access our [Wellness Package](#).

Thank you for trusting us and this technology with your health. We hope that the information contained is helpful for you.

SUMMARY RESULTS and NOTES

- 1. The overall biofield is mildly out of balance. Major helminth infection (pinworm) detected in the digestive system.
- 2. Important pathologies/deficiencies/viruses detected:
 - Multiple forms of Anemia that can be caused by pathogenic microorganisms and to a lesser degree deficient diet
 - Neurological imbalance (neuralgia, neurasthenia, migraines) - can be caused by pathogenic microorganisms
 - Digestive pathologies (gastritis, dyskinesia, colitis) - are associated as bodily responses to pathogenic microorganisms
 - Osteoporosis - primarily caused by pathogenic microorganisms disrupting collagen production and localized infections in the area
 - Gland Dysfunctions (diffuse goitre, trectoxicosis, nodular toxic goiter, prostatitis) - are associated as bodily responses to pathogenic microorganisms
- 3. 3 Month Detox Schedule:
 - Month 1: a. Ivermectin - single dose as prescribed by body weight, ideally on the new moon (+/- 3 days)
 - b. Pine Gum Spirits - please ask for protocol details if you do not know
 - c. Enso Parasite Sweeper
 - d. Colon Hydrotherapy - 2 to 3 sessions every other day within one week
 - e. Bladder Tea (horsetail, dandelion, bearberry, corn silk, parsley)
 - f. Goldenseal + Cranberry
 - g. IV Ozone or IV H2O2: 1 session per week for four weeks
 - Month 2: a. Ivermectin - single dose as prescribed by body weight, ideally on the new moon (+/- 3 days) OR Pine Gum Spirits
 - b. Parafarm or equivalent
 - Month 3: a. Ivermectin - single dose as prescribed by body weight, ideally on the new moon (+/- 3 days) OR Pine Gum Spirits
 - b. Enso Parasite Sweeper
 - c. Ozone Rectal Insufflation
 - d. Liver Cleanses - ask for book
 - e. follow up Biorez scan
- 4. Recommended Supplementation: B-complex, iron rich foods (beets,pumpkin seeds,raw egg yolks), enzymes w/ probiotics, silica rich foods (horsetail tea, bamboo, red algae)
- 5. Suggested Self Empowerment/Investment:
 - a. Join our telegram channel <https://t.me/biorezwelness>

DETAILED RESULTS

This scan is based on the fundamental principle of resonance. The items (etatoms) listed below were found to be resonant in your field in the systems and locations described. The numerical values (Dispersion/Resonance) range from 0.70 to 0.00 where 0.00 is the highest

CUSTOM REPORTS

Important Functional Innovation

This system employs a type of scanning called **4D Torsion scanning**. Coupled with four highly sensitive bio-sensors, this three dimensional scanning methodology goes deeper into the body and improves the quality of analysis, especially of pathology. The setup is finely tuned with a handheld quantum sensor. The results are highly accurate (96%+) and fast. A full body scan takes 25 minutes.

Out of the Box

All that is needed to start benefiting is a laptop or desktop computer with these specifications:

Operating System: Windows 10/11, 32/64-bit versions **CPU:** Intel i5+/AMD Ryzen 5+ **RAM:** 8 Gb+ **Hard Drive:** 100GB+

Usability and Training

You don't need to be a computer expert to learn how to use this device. The User's Manual is quite detailed and is designed to help you complete your first scan in a short time. It comes in a digital PDF format. Please contact us if you would like to receive a copy of the manual for evaluation purposes prior to purchase.

Basic Level One training is included with this system. It is an interactive and live one-on-one virtual session with an experienced Biorez practitioner. Upon completion, you will be competent in basic practice and application of bioresonance technology. You will receive a **Certificate of Completion** to validate your investment.

Sales and Technical Support

We launched a suite of **Help tools** to respond to client inquiries. A live chat, knowledge base and support ticketing system are in place to ensure your success.

Self Serve Resources

These additional services are included with the purchase of this system:

Resource #1 - Zammad Knowledge Base: An easy to use and actively populating Knowledge Base.

Resource #2 - Nextcloud: the BIORes Wellness Network is managed by our private Nextcloud server. You may access software/updates, documents/manuals, an empirically validated wellness library, media for promotional use, and communicate with other BIORes Practitioners. You may also use the service to host and synchronize your files, contacts, tasks, and, calendar. There is an entourage of other services and apps. Gain from the shared experiences of the BIORes team.

Resource #3 - OpenEMR: Our secure and self hosted OpenEMR Electronic Health Record and Medical Practice Management solution to help automate and organize practicing bio-resonance labs.

Resource #4 - Affiliate Program: BIORes Network Members are eligible to join our affiliate program for the opportunity to receive commissions on sales referrals.

Warranty

Feel supported with a 36 month warranty against defects in workmanship and dead on arrival (DoA) situations including shipping costs to repair or replace your device. Check our knowledge base for more details.
